

Speed Timing Device Operator Training

EFFECTIVE-

Unique and exclusive video simulator training allows officers accurate, hands-on training, with individualized instruction, in a controlled classroom environment. Training certification helps assure that your officers know how to properly operate your speed timing equipment and gives the officer additional credibility in court.

ACCURATE-

Because we control the video simulation, the instructor is able to ensure that the officer is developing the appropriate skills to effectively and accurately operate your equipment.

ECONOMICAL-

Because portions of the training are self-guided or self-administered, you only have to commit your officers to a four hour classroom session. The remainder of the skill building exercises are done while the officer is on regular patrol duty, utilizing department equipment, thereby maximizing the hours that you are paying your officers.

PROFESSIONAL-

Our instructors: Jim Cowden over 16 years experience in the speed-timing field from training, calibration, repair to product development and manufacturing. Gerry Gallagher is a retired State Police Sergeant with over 29 years of Law Enforcement experience as well as being an experienced MPOETC certified instructor.

YIS/Cowden Group, Inc.-

Provides Speed Timing Device Operator Training for *all speed timing devices* approved for use by Municipal Police in the Commonwealth of Pennsylvania. This includes: V-SPEC, VASCAR-Plus, VASCAR-Plus II, VASCAR-Plus III, Tracker, Robic Speed Timers, ENRADD and the ENRADD Wireless System, ESP and Speedchek.
